

Tendring District Council Local Plan Review

Integrated Sustainability Appraisal (ISA): Environmental Report - Annex C

August 2026

About us

Place Services is a leading public sector provider of environmental assessment, planning, design, and management services. Our combination of specialist skills and experience means that we are uniquely qualified to help public organisations meet the requirements of the planning process, create practical design solutions, and deliver environmental stewardship.

Place Services has a proven track record of delivering sustainable, creative, and effective solutions for the built environment. Our in-house expertise comprises a multidisciplinary team which includes planners, urban designers, landscape architects, flood specialists and public art consultants. Our approach is client led; we work alongside our clients to deliver services, projects, and planning objectives in a collaborative and cost effective way.

Copyright

This report may contain material that is non-Place Services copyright (e.g. Ordnance Survey, British Geological Survey, Historic England), or the intellectual property of third parties, which Place Services is able to provide for limited reproduction under the terms of our own copyright licences or permissions, but for which copyright itself is not transferable by Place Services. Users of this report remain bound by the conditions of the Copyright, Designs and Patents Act 1988 with regard to multiple copying and electronic dissemination of the report.

Disclaimer

The material contained in this report was designed as an integral part of a report to an individual client and was prepared solely for the benefit of that client. The material contained in this report does not necessarily stand on its own and is not intended to nor should it be relied upon by a third party. To the fullest extent permitted by law Place Services will not be liable by reason of breach of contract, negligence, or otherwise for any loss or damage (whether direct, indirect or consequential) occasioned to any person acting or omitting to act or refraining from acting in reliance upon the material contained in the report. Loss or damage as referred to above shall be deemed to include, but is not limited to, any loss of profits or anticipated loss of profits damage to reputation or goodwill, loss of business, or anticipated loss of business, damages, costs, expense incurred or payable to any third party (in all cases whether direct, indirect or consequential) or any other direct, indirect or consequential loss or damage.

1. Introduction

1.1 The Assessment of Site Options

The Plan Review's new site allocations and reasonable alternative options to them are required to be assessed to identify any significant effects on the ISA Objectives and also to aid the Council's site selection process.

The sites included within this Interim Report are those that have been considered for allocation within the Regulation 18 'Preferred Options' Local Plan. The sites are in conformity to the Council's rationale for selecting sites at this stage, notably in line with the following sifting criteria:

- Reason 1 – Too Remote Sites: that are clearly remote and disconnected from existing settlements, services, and infrastructure have not been analysed. Growth in such areas would undermine the plan-led approach and the Council's strategic vision for development.
- Reason 2 – Within a Strategic Green Gap: The Council aims to retain and potentially expand Strategic Green Gaps to preserve settlement identity and prevent coalescence. These include:
 1. Clacton-on-Sea and Little Clacton
 2. The Garden Community area
 3. Frinton, Walton & Kirby Cross
 4. Manningtree, Lawford & Mistley

Sites within these designated areas have been excluded from further analysis, as these gaps remain integral to the Local Plan strategy through to 2041.

- Reason 3 – Within a National Landscape Area: These areas benefit from special landscape protection. Any future development would conflict with existing policy safeguards.
- Reason 4 – Within Safeguarded Open Space or Local Wildlife Site: Development in these areas would result in the permanent loss of designated open space or wildlife habitat, failing to meet current policy exceptions likely to be retained in the next Local Plan.
- Reason 5 – Within or very close to the Tendring–Colchester Borders Garden Community (TCBGC) Area: Sites within or adjacent to the TCBGC designation were excluded due to:
 1. Significant development already allocated or underway
 2. Expected substantial contribution to housing delivery through to 2041
 3. Limited capacity of the housing market and infrastructure to accommodate further growth beyond what is already planned

- Reason 6 – Sites with Extant Planning Permission: Sites already benefiting from planning permission have not been formally allocated, as doing so would serve no additional purpose.
- Reason 7 – Edge of Ardleigh: Areas between the TCBGC and Ardleigh were excluded due to:
 1. Existing strategic allocations
 2. Anticipated substantial housing delivery through to 2041
 3. Limited capacity of local infrastructure and services, especially during early phases of Garden Community development when key infrastructure may still be under construction – during these stages the initial new growth and new residents moving in will put additional pressure on existing services in areas such as Ardleigh.
- Reason 8 – Edge of Elmstead: Similar to Ardleigh, areas between the TCBGC and Elmstead were excluded due to:
 1. Existing strategic allocations
 2. Anticipated substantial housing delivery through to 2041
 3. Limited capacity of local infrastructure and services, particularly during initial phases of Garden Community development – during these stages the initial new growth and new residents moving in will put additional pressure on existing services in areas such as Ardleigh.
- Reason 9 – Edge of Clacton (Greater Clacton Area): Sites in this area were excluded due to:
 1. Significant development already allocated or underway, including over 3,500 new homes at Hartley Gardens, Rouses Farm, and Oakwood Park
 2. Expected substantial contribution to housing delivery through to 2041
 3. Limited capacity of the housing market and infrastructure to absorb additional growth beyond current allocations

1.1.1 What's changed since the Regulation 18 stage?

At this Regulation 19 stage some amendments have been made to existing site assessments to factor in consultation responses. Notably these include:

- Sustainable transport – in response to consultation comments surrounding connectivity made by Essex County Council.
- Ancient Woodland – in response to comments made by the Essex Wildlife Trust that Ancient Woodland was not consistently identified within the Regulation 18 ISA site assessments.

In addition, several 'new' sites have been introduced at this stage. The following table outlines the ISA framework proposed for the appraisal of potential allocation sites.

Table 1: ISA Framework (Sites)

Proposed SA Objective (2026)	Sub criteria	Significantly Positive Effects (++)	Positive Effects (+)	Uncertain Effects (?)	Neutral Effects or No Effect (0)	Negative Effects (-)	Significantly Negative Effects (- -)
1) To deliver a sufficient supply of homes for all including an appropriate mix of housing types	Housing supply	The site could be considered strategic for the purposes of meeting the District's housing targets over the plan period	The site has been promoted for housing and is in conformity with the Spatial Strategy and Settlement Hierarchy	Where applicable	Site is submitted for a non-residential use	N/A	N/A
	Type and tenure	Site is submitted for purely affordable housing	Site is submitted for housing of an identified need (type / tenure) in the Housing Needs Assessment (HNA)	Where applicable	Site is submitted for a non-residential use	N/A	N/A
2) To promote	Employ-	Proposal is for	Proposal is for	Where	Non-	Proposal sees	N/A

Proposed SA Objective (2026)	Sub criteria	Significantly Positive Effects (++)	Positive Effects (+)	Uncertain Effects (?)	Neutral Effects or No Effect (0)	Negative Effects (-)	Significantly Negative Effects (- -)
economic growth and diversity across the District	ment land	employment use	mixed-use incorporating employment opportunities	applicable	employment development	a loss of previously employment land	
	Regeneration	Site is for strategic employment land in an industry and area of identified need	Site is for employment land in an industry and area of identified need	Where applicable	Non-employment development	Proposal would see a minor or net loss of employment land in key business and regeneration area	Proposal would see the loss of strategic employment land
3) To maximise the potential for sustainable transport uptake, including	Distances to town / village / neighbourhood centres	< or = to 400m	> 400 to 800m	Where applicable	Where applicable	> 800m to 1.4km	>1.4km

Proposed SA Objective (2026)	Sub criteria	Significantly Positive Effects (++)	Positive Effects (+)	Uncertain Effects (?)	Neutral Effects or No Effect (0)	Negative Effects (-)	Significantly Negative Effects (- -)
walking and cycling	Distance to a train station / bus stop	< or = to 400m to a train station	> 400 to 800m to a train station	Where applicable	Where applicable	> 800m to 1.4km to a train station or bus stop	>1.4km to a train station or bus stop
4) To ensure resilient sustainable communities with better health, education, and social outcomes	Distance to GP services	< or = to 400m	> 400 to 800m	Where applicable	Non-residential proposals	> 800m to 1.4km	>1.4km
	Distance to primary school	< or = to 400m	> 400 to 800m	Where applicable	Non-residential proposals	> 800m to 1.4km	>1.4km
5) To ensure that development is located sustainably and makes efficient use of land	Brownfield land	N/A	Site is entirely or partly but predominantly on brownfield land	Where applicable	N/A	Site is entirely or partly but predominantly greenfield land	N/A
	Contamin-	N/A	Development of site would	Where	Site is not on contaminated	N/A	N/A

Proposed SA Objective (2026)	Sub criteria	Significantly Positive Effects (++)	Positive Effects (+)	Uncertain Effects (?)	Neutral Effects or No Effect (0)	Negative Effects (-)	Significantly Negative Effects (- -)
	ated land		see the remediation of contaminated land	applicable	land		
6) To conserve and where possible enhance biodiversity and geodiversity designations, as well as natural habitats and protected species	Wildlife designations	N/A	N/A	Where applicable	The site would have no impact on a wildlife designation	The proposal would see the loss of functionally linked land (to a Habitats site) OR The site is within or adjacent to a wildlife designation of local importance	The proposal would have a likely significant effect on the integrity of a Habitats site OR The site is within a wildlife designation of international or national importance
	Biodiversity	N/A	N/A	Where	The site would have no	The site is on or adjacent to	The site is known to

Proposed SA Objective (2026)	Sub criteria	Significantly Positive Effects (++)	Positive Effects (+)	Uncertain Effects (?)	Neutral Effects or No Effect (0)	Negative Effects (-)	Significantly Negative Effects (- -)
	features			applicable	impact on biodiversity features	priority habitat	include protected species
7) To ensure that development delivers net gains in biodiversity, as well as green and blue infrastructure	BNG	The proposal will include over the minimum net gain requirement	The proposal will include the minimum net gain requirement	Where applicable	Where applicable	N/A (all proposals must provide BNG)	N/A (all proposals must provide BNG)
8) To conserve and where possible enhance the historic environment (both above and below ground), built and cultural	Designated heritage assets (above and below ground)	The proposal can be considered to enhance a designated asset on the at risk register	The proposal can be considered to enhance a designated asset	Where applicable	The proposal will have no effect on any designated assets	There is considered to be the potential for an impact on the significance of a designated asset or its setting,	There is considered to be an impact that could affect the significance of a designated asset or its setting with no

Proposed SA Objective (2026)	Sub criteria	Significantly Positive Effects (++)	Positive Effects (+)	Uncertain Effects (?)	Neutral Effects or No Effect (0)	Negative Effects (-)	Significantly Negative Effects (- -)
heritage assets, and their settings						although mitigation is possible.	mitigation suitable.
	Non-designated heritage assets (above and below ground)	N/A	N/A	Where applicable	The proposal will have no effect on any non-designated assets	There is considered to be the potential for an impact on the significance of a non-designated asset or its setting, although mitigation is possible.	There is considered to be an impact that could affect the significance of a non-designated asset or its setting with no mitigation suitable.
9) To conserve and where possible enhance the quality and	Designations and landscape character	N/A	N/A	Where applicable	The proposal would have no landscape implications	The proposal is within an area identified as highly sensitive in the	The proposal is within the Suffolk Coast & Heaths

Proposed SA Objective (2026)	Sub criteria	Significantly Positive Effects (++)	Positive Effects (+)	Uncertain Effects (?)	Neutral Effects or No Effect (0)	Negative Effects (-)	Significantly Negative Effects (- -)
character of landscapes and landscape features						Landscape Character Assessment	AONB
	Landscape principles / features	N/A	The proposal would lead to landscape enhancements	Where applicable	The proposal is within the development boundary	The proposal would contribute to the coalescence of settlements AND/OR The site contains landscape features synonymous with the relevant Landscape Character Area	The proposal would significantly contribute to the coalescence of settlements AND/OR The site contains multiple landscape features synonymous with the relevant Landscape Character

Proposed SA Objective (2026)	Sub criteria	Significantly Positive Effects (++)	Positive Effects (+)	Uncertain Effects (?)	Neutral Effects or No Effect (0)	Negative Effects (-)	Significantly Negative Effects (- -)
							Area
10) To maintain and where possible improve water quality and the sustainable use of ground and surface water resources	Ground-water	N/A - It is not considered possible for significant positive impacts to be ensured	N/A - It is not considered possible for positive impacts to be ensured	The site is partly within ground water Source Protection Zone III (Total Catchment).	There are no known constraints.	The site is located within ground water Source Protection Zone II (Outer Zone)	The site is located within ground water Source Protection Zone I (Inner Zone).
	Surface water	N/A - It is not considered possible for significant positive impacts to be ensured	N/A - It is not considered possible for positive impacts to be ensured	Where applicable	The site is not within an area identified as having any surface water nitrate or pesticide issues	The site is within an area identified as having medium priority surface water nitrate or pesticide issues	The site is within an area identified as having high priority surface water nitrate or pesticide issues
11) To maintain and where	Air quality	N/A	N/A	Where applicable	All other sites	The proposal could lead to	N/A (no AQMAs in

Proposed SA Objective (2026)	Sub criteria	Significantly Positive Effects (++)	Positive Effects (+)	Uncertain Effects (?)	Neutral Effects or No Effect (0)	Negative Effects (-)	Significantly Negative Effects (- -)
possible improve air quality						frequent car journeys through North Road junction, Great Clacton (where there are potential exceedances in Air Quality Objectives)	Plan area)
12) To protect and improve soil quality, in particular the best and most versatile agricultural land	Agricultural Land Classification / BMV	N/A	The site is on brownfield land.	The site is within land identified as Grade 3 (Good to Moderate) ALC	The site is within land identified as Grade 4-5 (Poor / Very Poor) ALC OR The site is not located on current agricultural	The site is within land identified as Grade 2 (Very Good) ALC	The site is within land identified as Grade 1 (Excellent) ALC

Proposed SA Objective (2026)	Sub criteria	Significantly Positive Effects (++)	Positive Effects (+)	Uncertain Effects (?)	Neutral Effects or No Effect (0)	Negative Effects (-)	Significantly Negative Effects (- -)
					land		
13) To ensure, where possible, that new development is carbon neutral and increases the production of energy from renewable sources where appropriate	Renewable energy generation	N/A	The proposal includes on-site renewable energy solutions	Where applicable	All other proposals	N/A	N/A
14) To ensure that development does not lead to an increase in flood risk and is prepared for the impacts of	Fluvial flood risk	N/A	N/A	Where applicable	The site is within Flood Risk Zone 1	The site is within Flood Risk Zone 2	The Site is within Flood Risk Zone 3
	Surface water flood risk	N/A	N/A	The site is in an area identified as having a 'low'	The site is in an area identified as having a 'very	The site is in an area identified as having a 'high'	The site is in an area identified as having a 'very

Proposed SA Objective (2026)	Sub criteria	Significantly Positive Effects (++)	Positive Effects (+)	Uncertain Effects (?)	Neutral Effects or No Effect (0)	Negative Effects (-)	Significantly Negative Effects (- -)
climate change				risk for surface water flood risk OR Where applicable	low' risk for surface water flood risk	risk for surface water flood risk	high' risk for surface water flood risk

2. The Site Assessments

2.1 Housing Sites

The following sub-sections outline those sites, per settlement, that are allocated and have been considered for allocation (i.e. represent 'reasonable alternatives') for housing throughout the plan making process.

2.1.2 Sites in Weeley & Weeley Heath

Table 2: Sites in Weeley & Weeley Heath

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
Allocated sites			
SAMU6	Land South of Colchester Road, Weeley	Mixed use	900
MSA25	Land south of Mill Lane, Weeley Heath	Housing	17
MSA24	Land east of Bentley Road, Weeley Heath	Housing	60
Non-allocated sites			
CFS97	Land rear of Malmore, Clacton Road, Weeley Heath	Housing	10-29
CFS104	Gutteridge Hall, Gutteridge Hall Lane, Weeley	Housing	10-29 (20)
CFS108	Land East of Willow Walk, Weeley	Housing	10-29
CFS143	Land Laying North of Colchester Road / East of Crown Lane	Housing	30-99
CFS216	Land west of Crow Lane, Weeley	Housing	100-299 (250)

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
CFS219	Weeley Gardens East, Land east of Crow Lane, Weeley	Housing	80
CFS1770	Woodpeckers, Clacton Road, Weeley	Housing	25
CFS622	Pestles, Crow Lane	Housing	10-29
CFS56	3 Mill Lane, Weeley Heath	Housing	10-29
CFS106	Land West of Rectory Road, Weeley	Housing	40
CFS107	Land East of Rectory Road, Weeley Heath	Housing	40
CFS113	Old Rectory, Rectory Road, Weeley Heath	Housing	10-29
CFS34	Land next to Stardust, Victoria Road, Weeley Heath	Housing	10-29
CFS485	Land South of Plough Lodge, Rectory Road, Weeley Heath	Housing	10-29
CFS2229	1 Barnfields, Clacton Road, Weeley Heath	Housing	100
CFS2153	2 Barnfields, Clacton Road, Weeley Heath	Housing	34
CFS2131	Dickebusch, Clacton Road, Weeley Heath	Housing	10-29
CFS3259	Land to the East of Bentley Road and South of Wenlock Road	Housing	10-29 (14)

2.1.3 Sites in Wix

Table 3: Sites in Wix

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
Allocated sites			
MSA26	Land south of Colchester Road	Housing	20
Non-allocated sites			
CFS249	Land south side of Colchester Road, Wix	Housing	10-29 (20)
Previous Reg 18 allocation MSA27	Abbey Bottom Farm	Housing	20

2.1.4 Sites in Alresford

Table 4: Sites in Alresford

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
Allocated sites			
MSA7	Land south-west of Colchester Main Road	Housing	40
SAH6	Land east of Cockaynes Lane	Housing	100
Non-allocated sites			

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
CGS27	Kemp Brook Farm, Wivenhoe Road	Housing	150
CFS2179	Land to the West of the B1027, Alresford	Housing	60
CFS1214	Kemp Brook Farm, Wivenhoe Road	Housing	60

2.1.5 Sites in Frinton, Walton & Kirby Cross

Table 5: Sites in Frinton, Walton & Kirby Cross

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
Allocated sites			
MSA2	Land adjacent Branscombe Close, Frinton	Housing	40
SAH2	Land north of Thorpe Road, Kirby Cross	Housing	420
Non-allocated sites			
CFS240	Land East of Beaumont Manor Care Home, Kirby Road, Great Holland	Housing	600
CFS179	Land north of Wade Reach, Walton on the Naze (appraised separately)	Housing	Up to 100
CFS129	Land to the rear of 173 – 203, Thorpe Road, Kirby Cross	Housing	10-29 (20)
CFS103	Halstead Road, Kirby Cross, Frinton on Sea	Housing	10-29 (10)

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
Previous Reg 18 allocation SAH3 ¹	Land off Arthur Ransome Way, Walton	Housing	200

2.1.6 Sites in Great Bentley

Table 6: Sites in Great Bentley

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
Allocated sites			
MSA10	Land south of Weeley Road	Housing	80
SAH7	Land to the East of Admirals Green	Housing	120
MSA21	Land to the East of Heckfords Road	Housing	80
Non-allocated sites			
G.BEN 01	Land west of Plough Road	Housing	75
CFS177	Land east of Plough Road	Housing	150
CFS21	Land to the East of Admirals Green	Housing	100-299
CFS2183	Land West of Heckford's Road	Housing	100-299 (180)

¹ Also includes site: CFS179

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
CFS228	Land to the north of Thorrington Road	Housing	30-99 (75)
CFS1094	Aingers Green Road, Aingers Green	Housing	10-29
CFS173	Land adjacent to George Mitchell Close, off St Mary's Road, Aingers Green	Housing	15
CFS484	Admirals Farm, Land South of Moors Lane	Housing	100-299
CFS3103	Land west of B1027 and east of Bentley Country Park	Housing	30-99 (51)

2.1.7 Sites in Bradfield

Table 7: Sites in Bradfield

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
Allocated sites			
MSA9	Land south of Windmill Road and east of Straight Road	Housing	100
MSA36	Land North of Wix Road, Bradfield	Housing	25
MSA37	Land East of The Street, Bradfield	Housing	30
Non-allocated sites			
CFS128	Land North of Windmill Road	Housing	10-29

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
CFS133	Land East of Windmill Road	Housing	33-99
CFS1800	Land off Barrack Street	Housing	10-29
CFS214	Bradfield West	Housing	10-29
CFS223	Land south of Steam Mill Road	Housing	30-99
CFS621	Land at Bradfield Fruit Farm, The Street	Housing	10-50
CFS1558	Cherry Gardens, Windmill Road	Housing	10
CFS1064	Land North of Mill Lane	Housing	120
CFS1039	Land east of The Street	Housing	100
CFS513	Grasmere, The Street, Bradfield	Housing	10-29
CFS394	The Old Ram & Hoggett, Heath Road	Housing	10-29

2.1.8 Sites in Brightlingsea

Table 8: Sites in Brightlingsea

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
Allocated sites			
MSA6	Land at Pannell Place	Housing	10
MSA5	Brightlingsea Telephone Exchange, 16	Housing	15

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
	New Street		
MSA33	Well House Site, Chestnut Way	Housing	60
MSA34	Vicarage Field, Church Road	Housing	30
MSA35	Land North of Robinson Road	Housing	25
Non-allocated sites			
CFS2214	Land West of Church Road	Housing	150
CFS29	Oakwood, Land North of Samsons Road	Housing	12
CFS254	Top (northern section) of Lime Street	Housing	10-29
CFS270	The Little Boatyard, Lime Street	Housing	10-29 (3 submitted)
Previous Reg 18 allocation SAH4	Land East of Church Road	Housing	150

2.1.9 Sites in Thorrington

Table 9: Sites in Thorrington

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
Allocated sites			

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
MSA23	Land at Avocet Place	Housing	60
Non-allocated sites			
CFS155	Land north of Clacton Road	Housing	30-99 (60)
CFS156	Land west of Church Road	Housing	30-99 (50)
CFS250	Land on west side of Station Road	Housing	10-29
CFS251	Land to the west of CFS250, Station Road	Housing	10-29
CFS2209	Land East of Frating Road, Frating Road	Housing	30

2.1.10 Sites in Manningtree, Mistley and Lawford

Table 10: Sites in Manningtree, Mistley and Lawford

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
Allocated sites			
SAMU7	Saltings Quarter, Riverside Avenue	Housing	40
MSA4	Crisp Malting	Housing	30
MSA3	Affinity Water	Housing	80
Non-allocated sites			

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
CFS131	Lawford House, Bromley Road, Lawford	Housing	100-299 (150)
CFS217	Manningtree Park South, Chequers Road, Manningtree	Housing	100-299 (180)
CFS239	Land at Tye Field, Grange Road, Lawford	Housing	30-99 (60-80)
CFS2225	Stacies Farm, Chequers Road, Little Bromley, Manningtree	Housing	400

2.1.11 Sites in Little Bromley

Table 11: Sites in Little Bromley

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
Allocated sites			
MSA20	Land south of Shop Road	Housing	17
Non-allocated sites			
L.BRO 01	Land east of Shop Road	Housing	10-12

2.1.12 Sites in Harwich and Dovercourt

Table 12: Sites in Harwich and Dovercourt

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
Allocated sites			
MSA1	Durite Works, Valley Road	Housing	82
SAH1	Vicarage Farm, Main Road	Housing	150
SAMU5 ²	Land South of Oakley Road	Mixed use	1,650
Non-allocated sites			
CFS28	Land to the south of Oakley Road, South Hall Farm (appraised separately)	Housing	100
CFS172	Land to West of Harwich Valley Development	Housing	800-1,999 (1,000)

2.1.13 Sites in St Osyth

Table 13: Sites in St Osyth

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
Allocated sites

CFS848	Land south of Harwich Road	Housing	70-80
CFS2195	Land North of Harwich Road	Housing	70-80
CFS3104	Land South of Rectory Road, Little Oakley (site 1)	Housing	Up to 38
CFS3105	Land South of Rectory Road, Little Oakley (site 2)	Housing	10-29 (14)

⁹ Estimated dwelling capacity identified as realistic by the LPA

Site reference	Site name	Use (as submitted)	Dwelling yield / employment floorspace
CFS3106	Land South of Rectory Road, Little Oakley (site 3)	Housing	10-29

2.2 Employment Sites

2.2.1 Overview of Sites

Please note that two of the Local Plan's employment elements have the same red-line boundary as housing allocations, representing mixed-use developments for which detailed masterplans will be forthcoming after the Local Plan is adopted. The sites are:

- Site 176: Tendring Central Garden Community, A120/A133 Junction
- Site 3289: Horsley Garden Community, Land at Horsley Cross, CO11 2PH

These masterplans will determine the precise extent and location of the employment elements within each wider site. As such, these employment allocations have not been assessed separately and as standalone options within this ISA Report.

Other employment allocations within the Local Plan also represent part of wider mixed-use, Garden Community, or Garden Village allocations, however the precise extent of the employment land within or adjacent to them have been defined. As such, these sites have been assessed separately as standalone employment options. These sites are:

- Site 81: Land North East of A133, Ravens Green, Colchester, Essex (part of the Garden Village allocation HGRE01)
- Site 80: Land South of Colchester Road, Frating, Colchester, Essex (part of the Garden Village allocation HGRE01)
- Site 2046: Land North of Harwich Road, Great Bromley, CO7 8SZ (part of the Garden Village allocation HGRE01)
- Site 220: Tendring Business and Innovation Hub (North-Western), Horsley Cross CO11 2PH (part of the Horsley Garden Community allocation (CFS3289))
- Site 218: Saltings Quarter - Manningtree Regeneration Area, Riverside Avenue East, Manningtree, CO11 1US (part of the mixed-use development CFS218)

2.2.2 The Employment Sites

Table 27: The Employment Sites

Site reference	Site name	Use (as submitted)
Allocated Sites		
SAE3	Collierswood Farm, Land North of the A120	Employment
146	Land North of A120 Harwich	Employment
62	Weeley Car boot site, Land to the North of Colchester Road, Weeley	Employment
Non-allocated Sites		
199	Land at Crown Quarry, Old Ipswich Road, Ardleigh, Essex, CO7 7RE	Employment
81	Land North East of A133, Ravens Green, Colchester, Essex	Employment
80	Land South of Colchester Road, Frating, Colchester, Essex	Employment
220	Tendring Business and Innovation Hub (North-Western), Horsley Cross CO11 2PH	Employment
218	Saltings Quarter - Manningtree Regeneration Area, Riverside Avenue East, Manningtree, CO11 1US	Employment
2046	Land North of Harwich Road, Great Bromley, CO7 8SZ	Employment
146	Land North of the A120 Harwich Road	Employment

Site reference	Site name	Use (as submitted)
CFS220 ¹⁰	Land north of A120, west of 2 Abbots Hall Cottages Harwich Road and Abbots Hall Clacton Road (assessed separately)	Employment

¹⁰ Site forms part of Allocation CFS3289 – Land at Horsley Cross

3. Detailed Assessments

3.1 Housing and Mixed-Use Sites

3.1.1 Allocated Sites in Weeley & Weeley Heath

Table 28: Detailed assessment of site SAMU6

Objective / criterion and commentary	Impact
Housing and employment focussed objectives	
1) Housing supply	++
1) Housing type and tenure	?/+
2) Employment land	++/+
2) Regeneration	?/+
Socially focussed objectives	
3) Distance to centres	--
3) Distance to public transport	++
4) Distance to GP services	--
4) Distance to primary school	++
5) Brownfield land	-
5) Contaminated land	?
Environmentally focused objectives	
6) Wildlife designations	0/?
6) Biodiversity features	0
7) BNG	+
8) Designated assets	0/?
8) Non-designated assets	0
9) Landscape character	0/?
9) Landscape features	?

Objective / criterion and commentary	Impact
10) Groundwater	0
10) Surface water	0
11) Air quality	0
12) ALC / BMV	?
13) Renewable energy	0/?
14) Fluvial flood risk	0/?
14) Surface water flood risk	0
Commentary The site is considered strategic for the purposes of meeting the District's housing targets and as a large site proposed for mixed-use development, could also be expected to offer significant impacts in relation to the delivery of employment land. At the quantum proposed, it can be considered that a range of house types and tenures could be forthcoming, however no such information has been submitted. The type of employment that would be forthcoming is unknown at this stage. The site is distanced from any Town, Village, or Neighbourhood Centre. The site is distanced from the nearest GP services in Great Bentley and Thorpe-le-Soken. The site is however within 400m from a primary school and Weeley train station. Development of the site is not considered to have any effect on any designated or non-designated heritage assets. Uncertain impacts are however highlighted at this stage, and pending further assessment, as Listed Buildings lie to the east of the site; however these are separated by the Weeley By-Pass and mitigation on such a large site is deemed achievable. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI. The site is outside, but adjoins the settlement boundary of Weeley, does not lead to the coalescence of settlements, and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site lies in Grade 3 ALC. The majority of the site is within FRZ1, with a small amount of FR3 centrally associated with a watercourse that can be avoided due to the size of the site. The site is in an area identified as having no surface water flood risk.

Commentary	
The site has been submitted for housing, however, is within a settlement that represents Tier Four in the settlement hierarchy (a less sustainable settlement). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from any Town, Village, or Neighbourhood Centre. The site is distanced from the nearest GP services in Great Bentley and Thorpe-le-Soken. The site is approximately 1400m from a primary school and over 1500m from Weeley train station. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is adjacent to a Local Wildlife Site to the west and is within the Impact Risk Zone (IRZ) of a nearby SSSI. The site would see the loss of Priority Habitat (broadleaved woodland and deciduous woodland). As a result, it is considered that BNG would be difficult to achieve on site in consideration of the dwelling yield submitted. The site is outside but adjoins the settlement boundary of Weeley Heath and does not lead to the coalescence of settlements. The site does however contain multiple features of landscape value, being a wooded area. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site lies in Grade 2 ALC. The site is within FRZ1 and includes only a small area identified as having a low chance of surface water flood risk.

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier Three in the settlement hierarchy (suitable for proportionate growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is within close proximity to the designated village centre within Alresford. The site is approximately 960m from the primary school in Alresford, however is within 600m of the train station of Alresford and is in close proximity to GP services. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is outside, but adjoins the settlement boundary of Alresford, does not lead to the coalescence of settlements, and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 2 ALC. The site is within FRZ1 however small parts of the south eastern area of the site are within an area identified as having a 'low' and 'medium' surface water flood risk. The site is within ground water Source Protection Zone III (Total Catchment).

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier Three in the settlement hierarchy (suitable for proportionate growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is within close proximity to the designated village centre within Alresford. The site is approximately 850m from the primary school in Alresford, however is within 500m of the train station of Alresford and is in close proximity to GP services. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is outside, but adjoins the settlement boundary of Alresford, does not lead to the coalescence of settlements, and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 2 ALC. The site is within FRZ1 and in an area identified as having no surface water flood risk. The site is within ground water Source Protection Zone III (Total Catchment).

Commentary The site has been submitted for housing and is within a settlement that represents Tier Two in the settlement hierarchy (suitable for sustainable housing growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is within close proximity to the designated village centre within Kirby Cross. The site is also within close proximity to a GP services, a primary school, and is within 400m of the nearest train station at Kirby Cross. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of three Listed Buildings to the south west of the site. Despite this, mitigation is considered possible and uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is outside, but adjoins the settlement boundary of Kirby Cross, does not lead to the coalescence of settlements, and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), however adjoins an area that is highly sensitive to the north (Hamford Coastal Slopes); nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 2 ALC. The site is within FRZ1 however has numerous small areas of land identified as having a 'high' surface water flood risk. It is considered that mitigation could be forthcoming however, due to the large size of the site and the majority of the site has no risk.

Commentary	

Objective / criterion and commentary	Impact
The site has been submitted for housing and is within a settlement that represents Tier Two in the settlement hierarchy (suitable for sustainable housing growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced to the designated village centre within Kirby Cross. The site is also distanced from GP services, a primary school, and is approximately 830m from the nearest train station at Kirby Cross. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of a Listed Building adjoining the presumed site access to the north west of the site. Further Listed Buildings are located to the north of the site on the opposite side of Thorpe Road. Despite this, mitigation is considered possible and uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. Development of the site would lead to the loss of broadleaved woodland and deciduous woodland Priority Habitat. As a result, it is considered that BNG would be difficult to achieve on site in consideration of the dwelling yield submitted. The site is outside, but adjoins the settlement boundary of Kirby Cross and does not lead to the coalescence of settlements. The site does however contain features of landscape value being a wooded area. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001). Nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 2 ALC. The site is within FRZ1 however has a small area identified as having a 'high' surface water flood risk in its eastern extent.

Commentary The site has been submitted for housing and is within a settlement that represents Tier Three in the settlement hierarchy (suitable for proportionate growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is within relatively close proximity to the designated village centre within Great Bentley. The site is also within close proximity to a bus stop, GP services, and a primary school. The site is also approximately 750m from the train station of Great Bentley. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is outside, but adjoins the settlement boundary of Great Bentley, does not lead to the coalescence of settlements, and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 2 ALC. The site borders a watercourse to the east however is predominantly within FRZ1. The site includes small areas of land in its southern parts that are identified as having a medium and high surface water flood risk.

Commentary	
The site has been submitted for housing, however, is within a settlement that represents Tier Four in the settlement hierarchy (a less sustainable settlement). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from any Town, Village, and Neighbourhood Centres. The site is within close proximity to a bus stop however is distanced from GP services and a primary school and is approximately 1700m from the nearest train station at Mistley. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is detached from the settlement boundary of Bradfield Heath, however does not lead to the coalescence of settlements, and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 2 ALC. The site is within FRZ1, and includes a small area identified as having a 'low' surface water flood risk. The site is within ground water Source Protection Zone III (Total Catchment).

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier Two in the settlement hierarchy (suitable for sustainable housing growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is within close proximity to the designated village centre within Brightlingsea and a bus stop. The site is however distanced from a primary school and GP services, as well as the nearest train station in Alresford. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site.	

Objective / criterion and commentary	Impact
The site is outside but adjoins the settlement boundary of Brightlingsea and does not lead to the coalescence of settlements. The site does however contain features of landscape value synonymous with the Landscape Character Area. The site is within a broad area that is highly sensitive to development (Brightlingsea Coastal Slopes), as per the Landscape Character Assessment (2001); nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 2 ALC. The site is within FRZ1 and in an area identified as having no surface water flood risk.

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier Two in the settlement hierarchy (suitable for sustainable housing growth). An employment use was formerly on the site, however it is considered to be unused. It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is within close proximity to the designated village centre within Brightlingsea. The site is also within close proximity to a bus stop, primary school, and GP services. However, the site is distanced from the nearest train station in Alresford. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of nearby Listed Buildings and the site's location within a Conservation Area. A degree of uncertainty is highlighted at this stage however, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site within the development boundary and is considered to have no landscape implications as a result. The site is within FRZ1 and in an area identified as having no surface water flood risk.

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier Two in the settlement hierarchy (suitable for sustainable housing growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is within close proximity to the designated village centre within Brightlingsea as well as a primary school, GP services and a bus stop. The site is distanced from the nearest train station in Alresford.	

Objective / criterion and commentary	Impact
There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is inside the settlement boundary of Brightlingsea and is brownfield land. The site does not contain features of landscape value synonymous with the Landscape Character Area. The site is within FRZ1 and in an area identified as having no surface water flood risk.

Commentary The site has been submitted for housing and is within a settlement that represents Tier Two in the settlement hierarchy (suitable for sustainable housing growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is approximately 1.2km from the designated village centre within Brightlingsea. The site is also approximately 1km from a primary school (although is in close proximity to a secondary school) and GP services. The site is also distanced from the nearest train station in Alresford. The site is adjacent to a listed building to the south and there is considered to be the potential for an impact on the significance of this asset or its setting. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site is adjacent to Ancient Woodland (The Grove) to the north, and is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is outside but adjoins the settlement boundary of Brightlingsea and does not lead to the coalescence of settlements. The site contains limited features of landscape value synonymous with the Landscape Character Area. The site is within a broad area that is highly sensitive to development (Brightlingsea Coastal Slopes), as per the Landscape Character Assessment (2001); nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 2 ALC. The site is within FRZ1 and contains small areas identified as having a 'low' surface water flood risk.

Commentary The site has been submitted for housing, however, is within a settlement that represents Tier Four in the settlement hierarchy (a less sustainable settlement). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from any Town, Village, or Neighbourhood Centres. The site is also distanced from a primary school, GP services, and the nearest train station (all in Alresford), however, is within close proximity to a bus stop. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site partly brownfield land and is outside, but in close proximity to the settlement boundary of Thorrington. The site does not lead to the coalescence of settlements, and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 2 ALC. The site is within FRZ1 and does not include any areas identified as having a chance of surface water flood risk.

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier Two in the settlement hierarchy (suitable for sustainable housing growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is currently in employment use (similarly within an area designated as such), and within a regeneration area, within which a purely housing led scheme would lead to minor negative effects. The site has been promoted for mixed-use development, retaining some of the employment uses on site, however a level of uncertainty exists at this stage as to whether existing uses would remain on site. The site is within the designated village centre within Manningtree. The site is also within close proximity of a primary school, GP services, and a bus stop. The site is approximately 900m from the train station in Manningtree. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the site's location adjacent to a Conservation Area. A degree of uncertainty is highlighted at this stage however, pending further evidence, and the possibility that mitigation could be achievable in consideration of the existing use of the site. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site, which it borders to the north. HRA Screening (2026) indicates that without mitigation Likely Significant Effects (LSEs) on Habitats sites can not be ruled out, associated with disturbance, water quality, and air pollution. This area is also identified as mudflat Priority Habitat, however the site is separated by a walk way that follows the border of the estuary. The site is within the settlement boundary of Manningtree. The site is within a broad area that is highly sensitive to development (Cattawade Marshes), as per the Landscape Character Assessment (2001); nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts and the fact that the site is brownfield. The site is within FRZ2 associated with the River Stour to the immediate north. The site is predominantly within an area of 'medium' surface water flood risk, however small areas identified as having a 'high' chance of surface water flood risk can also be found within the site. The site is within ground water Source Protection Zone III (Total Catchment).

14) Surface water flood risk	?/-
Commentary The site has been submitted for housing and is within a settlement that represents Tier Two in the settlement hierarchy (suitable for sustainable housing growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site has a previous employment use, however uncertainty is highlighted due to the vacancy of the site, which represents a brownfield plot. It is unknown whether the historic use, as a maltings, could need the remediation of any contaminants. The site is distanced from the designated village centre within Manningtree. The site is also within close proximity of a primary school, GP services, and a bus stop, as well as being adjacent to the train station in Mistley. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of nearby Listed Buildings and the site's location within a Conservation Area. A degree of uncertainty is highlighted at this stage however, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. HRA Screening (2026) indicates that without mitigation Likely Significant Effects (LSEs) on Habitats sites can not be ruled out, associated with disturbance, water quality, and air quality. The site additionally borders infilled Ancient Wood Pasture (also deciduous woodland Priority Habitat) to the south, and also 'no main habitat but additional habitats present' Priority Habitat to the south east. The site on brownfield land within the settlement development boundary, however is within a broad area that is highly sensitive to development (Stour Valley System), as per the Landscape Character Assessment (2001); nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts and the site's brownfield status. The site is predominantly within FRZ1 however the western part of the site is within FRZ2. Some areas of the site are identified as having a 'high' chance of surface water flood risk. The site is within ground water Source Protection Zone III (Total Catchment).

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier Two in the settlement hierarchy (suitable for sustainable housing growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site has an employment use; however uncertainty is highlighted due to site being submitted for allocation for housing. The site would therefore represent a brownfield plot. It is unknown whether the current / historic use, could require the remediation of any contaminants.	

Objective / criterion and commentary	Impact
The site is within close proximity to the designated village centre within Manningtree. The site is also within close proximity of a primary school, GP services, and a bus stop. The site is approximately 1km from the train station of Manningtree., There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of nearby Listed Buildings and the site's location within a Conservation Area. A degree of uncertainty is highlighted at this stage however, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. HRA Screening (2026) indicates that without mitigation Likely Significant Effects (LSEs) on Habitats sites can not be ruled out, associated with disturbance and water quality. The site is within the settlement boundary of Manningtree and it is considered there are no landscape implications as a result. The site is within FRZ1, however areas (associated with a water body in the site's south eastern extent), are identified as having a 'high' chance of surface water flood risk. The site is within ground water Source Protection Zone III (Total Catchment).

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier Two in the settlement hierarchy (suitable for sustainable housing growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The northern part of the site has an employment use, and development as proposed would see a loss of such land. The site is distanced from the designated village centre within Manningtree and the train station which is over 1400m to the north. The site is however within close proximity of a primary school, GP services, and a bus stop. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of a Listed Building (Lawford House) within the boundary of the site, which is predominantly in its setting. A degree of uncertainty is highlighted at this stage however, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The entirety of the site is wood-pasture and parkland and deciduous woodland Priority Habitat which would be lost to development. As a result, it is considered that BNG would be difficult to achieve on site in consideration of the dwelling yield submitted. The site is partly in the settlement boundary of Lawford and does not lead to the coalescence of settlements. The site does however contain multiple features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001); nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is within Grade 2 ALC. The site is within FRZ1 and only a few small areas are identified as having a low, medium and high chance of surface water flood risk. The site is within ground water Source Protection Zone III (Total Catchment).

14) Surface water flood risk	?/-
Commentary	
The site has been submitted for housing and is within a settlement that represents Tier One in the settlement hierarchy (the most sustainable locations for growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The proposal includes relocating the existing factory on site to a more modern building to be delivered on the Harwich Valley scheme, leaving largely uncertain effects on site due to the loss of employment land. The plot is therefore partly brownfield development; however it is uncertain whether the current / historic use would require the remediation of any contaminants. The site is distanced from the designated neighbourhood centre within Dovercourt. The site is also distanced from the nearest GP services (in Harwich) and approximately 3km from the nearest train station in Dovercourt, however is in close proximity to a primary school and a bus stop. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. A large proportion of the site is identified as deciduous woodland Priority Habitat, to the extent that it is considered that any BNG requirements would be difficult to meet on-site. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site is within the development boundary, however does include landscape features (deciduous woodland) that would likely be lost to development. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is within FRZ1, however a small area is identified as having a 'high' chance of surface water flood risk.

Commentary The site has been submitted for housing and is within a settlement that represents Tier One in the settlement hierarchy (the most sustainable locations for growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is approximately 500m from the designated neighbourhood centre within Dovercourt. The site is distanced from the nearest GP services (in Harwich), and the nearest train station in Dovercourt (approximately 2.5km to the east), however is in close proximity to a primary school and a bus stop. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of a Listed Building to the south of the red line boundary of the site. Uncertainty surrounding the significance of the impact is highlighted at this stage however, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is within the settlement boundary of Harwich and Dovercourt and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 3 ALC. The site is within FRZ1, and no areas of surface water flood risk can be found within the site.

Commentary	
The site is considered strategic for the purposes of meeting the District's housing targets and as a large site proposed for mixed-use development, could also be expected to offer significant impacts in relation to the delivery of employment land. It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. At its closest point the site is within approximately 500m from a neighbourhood centre, however the majority of the site is distanced from the designated neighbourhood centre within Dovercourt. The site is also distanced from the nearest GP services (in Harwich), and the nearest train station in Dovercourt (approx. 2.3km to the north east), however is in close proximity to a primary school and a bus stop. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of Listed Buildings to the north and north west of the site. Despite this, mitigation is considered possible and uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. Mitigation may be considered achievable due to	

Objective / criterion and commentary	Impact
the size of the site. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of nearby SSSIs and a Habitats site which borders the site to the south east. HRA Screening (2026) indicates that without mitigation Likely Significant Effects (LSEs) on Habitats sites can not be ruled out, associated with impacts on protected species outside the designated site, disturbance, and water quality. Additionally, the site borders coastal saltmarsh and 'no main habitat but additional habitats present' Priority Habitats to the east / south east. The site is outside, but adjoins the settlement boundary of Harwich and Dovercourt and does not lead to the coalescence of settlements. The site does however contain features of landscape value that are synonymous with the Landscape Character Area. The site spans two broad areas that are highly sensitive to development (Hamford Drained Marshes and Islands and Hamford Coastal Slopes), as per the Landscape Character Assessment (2001); nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within land classified as Grade4, non-agricultural, and also Grade 2 ALC where it joins the built up area to the north. The site is within FRZ1, however small areas identified as having a 'high' chance of surface water flood risk can be found within the site. Nevertheless, the size of the site ensures that mitigation or avoidance are likely to be successfully integrated.

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier One in the settlement hierarchy (the most sustainable locations for growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from the designated neighbourhood centre within Dovercourt. The site is also distanced from the nearest GP services (in Harwich), and the nearest train station of Dovercourt, however is in close proximity to a primary school and a bus stop. There is the potential for substantial harm to the significance of heritage assets and their setting as the site includes three Listed Buildings (associated with Michaelstow Hall and also the Grade I listed Parish Church of St Michael) within the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. A large proportion of the site is identified as wood-pasture and parkland, deciduous woodland, and Ancient Woodland pasture Priority Habitat, to the extent that it is considered that any BNG requirements would be difficult to meet on-site. The site is outside but adjoins the settlement boundary and does not lead to the coalescence of settlements. The site however contains multiple and varied features of landscape value. The majority of the site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), however the northern part is within such an area (Ramsey Creek). Nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The majority of the site is within Grade 3 ALC, however the northern extent is within Grade 4 ALC. The site is within FRZ1 and includes only a few small areas identified as having a low, medium and high chance of surface water flood risk.

14) Fluvial flood risk	0
14) Surface water flood risk	0
Commentary	
The site has been submitted for housing, however, is within a settlement that represents Tier Four in the settlement hierarchy (a less sustainable settlement). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from any designated Town, Village, or Neighbourhood centres. The site is however in close proximity to a bus stop, GP services, and a primary school. The site is distanced from rail services and the nearest rail station. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is outside, but adjoins the settlement boundary of Great Oakley, does not lead to the coalescence of settlements, and contains few features of landscape value. The site is within a broad area that is highly sensitive to development (The Oakley Ridge), as per the Landscape Character Assessment (2001); nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 2 ALC. The site is within FRZ1, and no areas of surface water flood risk can be found within the site.

Commentary	
The site has been submitted for housing, however, is within a settlement that represents Tier Four in the settlement hierarchy (a less sustainable settlement). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from any designated Town, Village, or Neighbourhood centres. The site is also distanced from the nearest GP services (in Great Oakley) and primary school (in Ramsey), however is within close proximity to a train station. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of a Listed Building to the east of the site. Despite this, mitigation is considered possible and uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however	

Objective / criterion and commentary	Impact
is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. Additionally the site borders deciduous woodland Priority Habitat to the north, associated with the railway line.	
The site is outside, but adjoins the settlement boundary of Wrabness, does not lead to the coalescence of settlements, and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The northern half (approximately) of the site is located within Grade 3 ALC, with the southern half within Grade 2 ALC. The site is within FRZ1, however small areas identified as having a 'high' chance of surface water flood risk can be found within the site.

Commentary	
The site has been submitted for housing, however, is within a settlement that represents Tier Four in the settlement hierarchy (a less sustainable settlement). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from any Town, Village, or Neighbourhood Centres as well as GP services, a primary school, the nearest train station at Kirby Cross (1.8km to the south east) and a bus stop. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is detached from the settlement boundary of Kirby-le-Soken, however does not lead to the coalescence of settlements, and contains few features of landscape value. The site is within a broad area that is highly sensitive to development (Hamford Coastal Slopes), as per the Landscape Character Assessment (2001); nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 2 ALC. The site is within FRZ1, however a large proportion of the site is identified as having a low, medium and high chance of surface water flood risk.

Commentary The site has been submitted for housing, however, is within a settlement that represents Tier Four in the settlement hierarchy (a less sustainable settlement). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from any Town, Village, or Neighbourhood Centres as well as GP services and a primary school. The site is distanced from the nearest train station at Kirby Cross, however is within close proximity of a bus stop. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the site's location adjacent to a Conservation Area. A degree of uncertainty is highlighted at this stage however, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. Additionally, the site borders traditional orchard Priority Habitat to the east. The site is outside, but adjoins the settlement boundary of Kirby-le-Soken, does not lead to the coalescence of settlements, and contains few features of landscape value. The site is within a broad area that is highly sensitive to development (Hamford Coastal Slopes), as per the Landscape Character Assessment (2001); nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 3 ALC. The site is within FRZ1, however the majority of the site is within an area identified as having a 'high' chance of surface water flood risk.

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier Three in the settlement hierarchy (suitable for proportionate growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is in close proximity to the village centre in Thorpe-le-Soken as well as GP services, a primary school, and a bus stop. The site is also within 800m of the train station of Thorpe-le-Soken. There is considered to be the potential for an impact on the significance of a designated asset or its	

Objective / criterion and commentary	Impact
setting, due to the site's location being partly within a Conservation Area. A degree of uncertainty is highlighted at this stage however, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. Additionally, the site borders woodpasture and parkland, and deciduous woodland Priority Habitats to the south west. The site also includes an area of Ancient Wood Pasture associated with Thorpe Hall in its eastern extent, which would presumably be lost. As a result, it is considered that it could be difficult to ensure BNG on site. The site is outside, but adjoins the settlement boundary of Thorpe-le-Soken and does not lead to the coalescence of settlements. The site does however contain features of landscape value synonymous with the Landscape Character Area and the aforementioned Ancient Woodland Pasture. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 3 ALC. The site is within FRZ1, and no areas of surface water flood risk can be found within the site.

Commentary	
The site has been submitted for housing, however, is within a settlement / area (Thorpe Station) that represents Tier Four in the settlement hierarchy (a less sustainable settlement). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is relatively distanced from the village centre in Thorpe-le-Soken however is within close proximity to the train station and a primary school. The site is relatively distanced to GP services. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the site's location adjacent to two Conservation Areas to the north and south. A degree of uncertainty is highlighted at this stage however, pending further evidence, and the possibility that mitigation could be achievable in consideration of the size of the site. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. Additionally, the site borders a small area of deciduous woodland Priority Habitat to the north east. The site is outside, but adjoins the settlement boundary of Thorpe Maltings however does not lead to the coalescence of settlements. The site however does contain features of landscape value synonymous with the Landscape Character Area. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 3 ALC. The site is within FRZ1, however areas identified as having a 'high' chance of surface water flood risk can be found within the site associated with a waterbody.

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier Three in the settlement hierarchy (suitable for proportionate growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from the village centre in Thorpe-le-Soken as well as GP services, and a primary school. The site is approximately 2.1km from the train station of Thorpe-le-Soken. The site is in close proximity to a bus stop however. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to two Listed Buildings being in close proximity to the site in the south. A degree of uncertainty is highlighted at this stage however, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is detached from the settlement boundary of Thorpe-le-Soken and does not lead to the coalescence of settlements. The site does however contain features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 3 ALC. The site is within FRZ1; however a significant part of the site is identified as having a high surface water flood risk.

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier Three in the settlement hierarchy (suitable for proportionate growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from the village centre in Little Clacton, as well as GP services (in north Clacton). The site is however in close proximity of a primary school in Little Clacton. The site is distanced from the rail network, however is in close proximity to a bus stop.	

Objective / criterion and commentary	Impact
It is considered that there is the potential for substantial harm on a heritage asset or its setting as the site contains a Listed Building, is within its setting, and is adjacent to two further Listed Buildings to the west. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. A significant proportion of the site is deciduous woodland Priority Habitat. As a result, it is considered that it would be difficult to ensure BNG on site. The site is detached from the settlement boundary of Little Clacton, however does not lead to the coalescence of settlements. The site contains multiple features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 3 ALC. The site is within FRZ1, however parts of the site are identified as of a high surface water flood risk.

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier Three in the settlement hierarchy (suitable for proportionate growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is in close proximity to the village centre in Little Clacton, as well as a primary school. The site is however distanced from GP services. The site is also distanced from the rail network, however is in close proximity to a bus stop. A Listed Building and its setting adjoins the site to the west, albeit only a small area of the whole site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is outside, but adjoins the settlement boundary of Little Clacton and contains few features of landscape value. The site would however lead to the coalescence of Little Clacton and Clacton and the merging of the two separate settlement boundaries. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001),	

Objective / criterion and commentary	Impact
nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 3 ALC. The site is within FRZ1, however there are some areas identified as having a high chance of surface water flood risk within the site.

Commentary	
The site is considered strategic for the purposes of meeting the District's housing targets and as a large site proposed for mixed-use development, could also be expected to offer significant impacts in relation to the delivery of employment land. It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from any Town, Village, or Neighbourhood centres. The site is similarly distanced from existing primary schools and GP services, however meets the threshold for new school delivery due to the scale of growth / housing quantum proposed. The site is within close proximity to a bus stop. The site is distanced from rail services and the nearest rail station. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of four Listed Buildings within the red line boundary of the site and also a Protected Lane in the site's eastern part. Uncertainty surrounding the significance of the impact is highlighted at this stage however, pending the submission of further detail at the planning application stage. Mitigation could be achievable in consideration of the large size of the site. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. Additionally, the site contains four small areas of deciduous woodland Priority Habitat, and two areas of Ancient Woodland, however it could be expected that these be integrated into any new development of the area, due to its size. The site, as a new settlement, is outside any settlement boundaries, and although neither have settlement boundaries would lead to the merging of the small settlements of Horsley Cross and Horsleycross Street. Inevitably due to its size, the site contains multiple features of landscape value synonymous with the Landscape Character Area. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is within land classified as both Grade 3 and Grade 2 ALC. A small area of the site (in its western extent) includes a watercourse and associated small areas of FRZ3. Small areas identified as having a 'high' chance of surface water flood risk can be found throughout the site. Nevertheless for both fluvial and surface water flood risk, the size of the site is likely to ensure that mitigation or avoidance can be successfully implemented. The site is within ground water Source Protection Zone	

Objective / criterion and commentary	Impact
III (Total Catchment).

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier Three in the settlement hierarchy (suitable for proportionate growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from any Town, Village or Neighbourhood centres, as well as GP services and a primary school, however is within close proximity of a bus stop. The site is distanced from rail services and the nearest rail station. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of a Listed Building to the north of the site. Uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zones (IRZs) of nearby SSSIs. The site is outside any settlement boundaries (the countryside as defined) however does not lead to the coalescence of settlements and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is entirely within Grade 3 ALC. Although the site borders a watercourse (and associated areas of FRZ3) to the west, the site is within FRZ1. The site does not include any areas of surface water flood risk. The site is within ground water Source Protection Zone III (Total Catchment).

a primary school, however is within close proximity of a bus stop. The site is distanced from rail services and the nearest rail station. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of a Listed Building to the south east of the site and another to the west albeit on the opposite side of Clacton Road. Uncertainty is highlighted at this stage, pending further evidence and in consideration of the size of the site and the possibility of mitigation. The site does not contain any wildlife designations, however is within the Impact Risk Zones (IRZs) of nearby SSSIs. The site includes a small area of deciduous woodland Priority Habitat and Ancient and Semi-natural Woodland in its north western extent; however it is considered that this could be integrated into any development due to the site's size. The site is outside any settlement boundaries (the countryside as defined) however does not lead to the coalescence of settlements and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The majority of the site is within Grade 2 ALC, however the western extent of the site is within Grade 3 ALC. The site is within FRZ1 and only has small areas identified as having a low, medium and high surface water flood risk. The site is within ground water Source Protection Zone III (Total Catchment).

Commentary	
The site has been submitted for housing and is within a settlement that represents Tier Three in the settlement hierarchy (suitable for proportionate growth). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from any Town, Village or Neighbourhood centres, as well as GP services and a primary school, however is within close proximity of a bus stop. The site is distanced from rail services and the nearest rail station. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zones (IRZs) of nearby SSSIs. The site is outside any settlement boundaries (the countryside as defined) however does not lead to the coalescence of settlements and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is entirely within Grade 3 ALC. Although the site borders a watercourse (and associated areas of FRZ3) to the west, the site is within FRZ1. The site only contains small areas identified with low, medium and high surface water flood risk. The site is within ground water Source Protection Zone III (Total Catchment).

14) Surface water flood risk	?/-
Commentary The site is considered strategic for the purposes of meeting the District's housing targets and as a large site proposed for mixed-use development, could also be expected to offer significant impacts in relation to the delivery of employment land. It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from any Town, Village, or Neighbourhood centres. The site is similarly distanced from existing primary schools and GP services, however meets the threshold for new school delivery due to the scale of growth / housing quantum proposed. The site does however include numerous bus stops. The site is distanced from rail services and the nearest rail station. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of seven Listed Buildings within the red line boundary of the site. Uncertainty surrounding the significance of the impact is highlighted at this stage however, pending the submission of further detail at the planning application stage. Mitigation could be achievable in consideration of the large size of the site. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. HRA Screening (2026) indicates that without mitigation Likely Significant Effects (LSEs) on Habitats sites can not be ruled out, associated with disturbance and water quality. Additionally, the site contains approximately six areas of deciduous woodland Priority Habitat, however it could be expected that these be integrated into any new development of the area, due to its size, and much of this habitat adjoins the A120 and A133. The site, as a new settlement, is predominantly outside any settlement boundaries however subsumes the settlement of Frating (which has a settlement boundary) and would lead to the merging of Frating with the small settlements of Balls Green and Hare Green (which do not have settlement boundaries) Street. Inevitably due to its size, the site contains multiple features of landscape value synonymous with the Landscape Character Area. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within land classified as Grade 3, Grade 2, and also (predominantly) Grade 1 ALC. A small area of the site (in its eastern extent) includes a watercourse and associated small areas of FRZ3. Small areas identified as having a 'high' chance of surface water flood risk can be found throughout the site. Nevertheless for both fluvial and surface water flood risk, the size of the site is likely to ensure that mitigation or avoidance can be successfully implemented. The site is within ground water Source Protection Zone III (Total Catchment).

The site has been submitted for housing, however, is within a settlement that represents Tier Four in the settlement hierarchy (a less sustainable settlement). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from any Town, Village, or Neighbourhood centres as well as the nearest GP services and primary school. The site is distanced from the rail network, however is within close proximity of a bus stop. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is outside, but adjoins the settlement boundary of Little Clacton, does not lead to the coalescence of settlements, and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 2 ALC. The site is within FRZ1, however areas identified as having a 'high' chance of surface water flood risk can be found within the site. The site is within ground water Source Protection Zone III (Total Catchment).	

3.1.44 Alternative Sites in Little Bentley

No reasonable alternative sites have been submitted / identified within Little Bentley.

Commentary	
The site has been submitted for housing, however, is within a settlement that represents Tier Four in the settlement hierarchy (a less sustainable settlement). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is identified as having a previous employment use, however uncertainty is highlighted due to the vacancy of the site, which represents a brownfield plot. It is unknown whether the historic use, as a haulage depot, could need the remediation of any contaminants. The site is distanced from any Town, Village, or Neighbourhood centres as well as the nearest primary school and GP services. The site is distanced from the rail network, however is within close proximity to a bus stop. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is outside any current settlement boundaries (the countryside, as defined) however does not lead to the coalescence of settlements, and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is within FRZ1, and no areas of surface water flood risk can be found within the site. The site is within ground water Source Protection Zone III (Total Catchment).

The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is outside, but adjoins the settlement boundary of Little Oakley and does not lead to the coalescence of settlements. The site does however contain features of landscape value synonymous with the Landscape Character Area. The site is within a broad area that is highly sensitive to development (Hamford Coastal Slopes / The Oakley Ridge), as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 3 ALC. The site is within FRZ1 and contains only small areas identified as having a low, medium and high chance of surface water flood risk.

Commentary	
The site has been submitted for housing, however, is within a settlement that represents Tier Four in the settlement hierarchy (a less sustainable settlement). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from any Town, Village, or Neighbourhood centres, a primary school, and GP services. The site is distanced from the rail network however is in close proximity to a bus stop. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is detached from the settlement boundary of Little Oakley however does not lead to the coalescence of settlements. The site contains few features of landscape value synonymous with the Landscape Character Area. The site is within a broad area that is highly sensitive to development

Commentary	
The site has been submitted for housing, however, is within a settlement that represents Tier Four in the settlement hierarchy (a less sustainable settlement). It can be considered that a range of house types and tenures could be possible, however no such information has been submitted. The site is distanced from any Town, Village, or Neighbourhood centres, a primary school, and GP services. The site is distanced from the rail network however is in close proximity to a bus stop. There is considered the potential for substantial harm to a heritage asset or its setting due to the presence of a Listed Building (The White House) within the boundary of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is detached from the settlement boundary of Little Oakley however does not lead to the coalescence of settlements. The site contains few features of landscape value synonymous with the Landscape Character Area. The site is within a broad area that is highly sensitive to development (The Oakley Ridge), as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 3 ALC. The site is within FRZ1 and does not contain any areas associated with surface water flood risk.

The site is distanced from any Town, Village, or Neighbourhood centres, a primary school, and GP services. The site is distanced from the rail network however is in close proximity to a bus stop. There are no designated or known non-designated heritage assets within proximity of the site.	

Objective / criterion and commentary	Impact
Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site. The site is detached from the settlement boundary of Little Oakley however does not lead to the coalescence of settlements. The site contains few features of landscape value synonymous with the Landscape Character Area. The site is within a broad area that is highly sensitive to development (The Oakley Ridge), as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is located within Grade 3 ALC. The site is within FRZ1 and does not contain any areas associated with surface water flood risk.	

3.2 Employment Sites

In addition to the employment allocations within the adopted Local Plan, the sites within the following sub-sections are newly allocated as part of the Local Plan Review. Alternative employment sites are similarly included and signposted within this section.

3.2.1 Allocated Employment Sites

3.2.1.1 SAE3: Grovewood Business Park, Collierswood Farm, Land North of the A120

Table 147: Detailed assessment of Site SAE3

Objective / criterion and commentary	Impact
Housing and employment focussed objectives	
1) Housing supply	0

11) Air quality	0
12) ALC / BMV	- -
13) Renewable energy	0/?
14) Fluvial flood risk	0
14) Surface water flood risk	0/-
Commentary	
The proposal is for employment use. The site is distanced from any Town, Village or Neighbourhood centres, as well as the rail network and the nearest bus stop in Bromley Cross. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of three Listed Buildings to the north of the site. Uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI. The site includes a small area of Ancient Woodland (also deciduous woodland Priority Habitat). Due to the size of the site however, it is considered that this area of habitat could be suitably avoided or impacts on it otherwise mitigated within any development. The site is outside any settlement boundaries (the countryside as defined) however does not lead to the coalescence of settlement. The site contains features of landscape value that are synonymous with the Landscape Character Area. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is within land identified as Grade 1 (Excellent) ALC. The site is within FRZ1, however small areas identified as having a 'high' chance of surface water flood risk can be found within the site. Nevertheless, the size of the site ensures that mitigation or avoidance are likely to be successfully integrated. The site is within ground water Source Protection Zone III (Total Catchment).	

3.2.1.2 Site 146: Land North of the A120 Harwich Road

Table 148: Detailed assessment of Site 146

Objective / criterion and commentary	Impact
Housing and employment focussed objectives	
1) Housing supply	0
1) Housing type and tenure	0
2) Employment land	++
2) Regeneration	+

3) Distance to centres	-
3) Distance to public transport	--
4) Distance to GP services	0
4) Distance to primary school	0
5) Brownfield land	-
5) Contaminated land	?
Environmentally focused objectives	
6) Wildlife designations	0/?
6) Biodiversity features	0
7) BNG	+
8) Designated assets	0/?
8) Non-designated assets	0
9) Landscape character	0/?
9) Landscape features	?/-
10) Groundwater	0
10) Surface water	0
11) Air quality	0

Objective / criterion and commentary	Impact
12) ALC / BMV	?
13) Renewable energy	0/?
14) Fluvial flood risk	--
14) Surface water flood risk	?/-
Commentary The site is distanced from any Town, Village or Neighbourhood centres. The site is distanced from the rail network however is within close proximity of a bus stop, however this is south of the A120 whilst the site lies north. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zones (IRZs) of nearby SSSIs. The site is outside the settlement boundary of Harwich (the countryside as defined), however does not lead to the coalescence of settlements, and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is entirely within Grade 3 ALC. The site is entirely within FRZ3, and small areas of the site are identified as having a 'high' chance of surface water flood risk. Pending the findings of any flood risk assessment and the application of sequential testing, it would be recommended that development be limited to water compatible or 'less vulnerable' uses.	

3.2.1.3 Site 62: Weeley Car Boot Site, Land to the North of Colchester Rd, Weeley

Table 149: Detailed assessment of Site 62

Objective / criterion and commentary	Impact

14) Surface water flood risk	?/0
Commentary	
The site is distanced from any Town, Village, or Neighbourhood Centre. The site is distanced from the rail network however is in close proximity to a bus stop. There are no designated or known non-designated heritage assets within proximity of the site. Nevertheless, a degree of uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI. The site is outside, and does not adjoin the settlement boundary of Weeley. The site does not lead to the coalescence of settlements and contains few features of landscape value. The site is not	

Objective / criterion and commentary	Impact
within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site lies in Grade 3 ALC. The site is within FRZ1, however some small areas of low / medium surface water flood risk are located on site.	

3.2.2 Alternative Employment Sites

3.2.2.1 Site 199: Land at Crown Quarry, Old Ipswich Road, Ardleigh, Essex, CO7 7RE

Table 150: Detailed assessment of Site 199

Objective / criterion and commentary	Impact

11) Air quality	0
12) ALC / BMV	?/-
13) Renewable energy	0/?
14) Fluvial flood risk	0
14) Surface water flood risk	0/-
Commentary	
The site represents a mineral working and as such can be considered neither brownfield or greenfield in its current / historic use. The site is distanced from any Town, Village or Neighbourhood centres, the rail network, and also the nearest bus stop. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of seven Listed Buildings adjacent to the site boundary. Uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zones (IRZs) of nearby SSSIs. The site includes areas of deciduous woodland Priority Habitat, some of which is also Ancient Woodland. Due to the size of the site however, it is considered that this area of habitat could be suitably avoided or impacts on it otherwise mitigated within any development. The site is outside any settlement boundaries (the countryside as defined) however does not lead to the coalescence of settlements. The site contains features of landscape value synonymous with the Landscape Character Area including elements associated with the restoration of the mineral working. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is predominantly within land identified as Grade 2 ALC, with some Grade 3 land in the site's south eastern extent. The site is within FRZ1, however small areas identified as having a 'high' chance of surface water flood risk can be found within the site. Nevertheless, the size of the site ensures that mitigation or avoidance are likely to be successfully integrated. The site is within ground water Source Protection Zone III (Total Catchment).	

3.2.2.2 Site 81: Land North East of A133, Ravens Green, Colchester, Essex

Table 151: Detailed assessment of Site 81

Objective / criterion and commentary	Impact

11) Air quality	0
12) ALC / BMV	+
13) Renewable energy	0/?
14) Fluvial flood risk	-
14) Surface water flood risk	?/-
Commentary	
The site has been promoted for mixed-use development, retaining some of the employment uses on site, however a level of uncertainty exists at this stage as to whether existing uses would remain on site. The site is within the designated village centre within Manningtree. The site is also within close proximity of a primary school, GP services, and a bus stop. The site is approximately 900m from the train station in Manningtree.	

Objective / criterion and commentary	Impact
There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the site's location adjacent to a Conservation Area. A degree of uncertainty is highlighted at this stage however, pending further evidence, and the possibility that mitigation could be achievable in consideration of the existing use of the site. The site does not contain any wildlife designations, however is within the Impact Risk Zone (IRZ) of a nearby SSSI and Habitats site, which it borders to the north. This area is also identified as mudflat Priority Habitat, however the site is separated by a walk way that follows the border of the estuary. The site is within the settlement boundary of Manningtree. The site is within a broad area that is highly sensitive to development (Cattawade Marshes), as per the Landscape Character Assessment (2001); nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts and the fact that the site is brownfield. The site is within FRZ2 associated with the River Stour to the immediate north. The site is predominantly within an area of 'medium' surface water flood risk, however small areas identified as having a 'high' chance of surface water flood risk can also be found within the site. The site is within ground water Source Protection Zone III (Total Catchment).	

3.2.2.7 Site 220: Land north of A120, west of 2 Abbotts Hall Cottages Harwich Road and Abbotts Hall Clacton Road (employment only)

Commentary	
The site is distanced from any Town, Village or Neighbourhood centres, and the rail network, however is within close proximity of a bus stop. There is considered to be the potential for an impact on the significance of a designated asset or its setting, due to the presence of a Listed Building to the north of the site. Uncertainty is highlighted at this stage, pending the submission of further detail at the planning application stage. The site does not contain any wildlife designations, however is within the Impact Risk Zones (IRZs) of nearby SSSIs. The site is outside any settlement boundaries (the countryside as defined) however does not lead to the coalescence of settlements and contains few features of landscape value. The site is not within a broad area that is highly sensitive to development, as per the Landscape Character Assessment (2001), nevertheless a degree of uncertainty is highlighted at this stage, pending any further evidence on specific impacts. The site is entirely within Grade 3 ALC. Although the site borders a watercourse (and associated areas of FRZ3) to the west, the site is within FRZ1. The site does not include any areas of surface water flood risk. The site is within ground water Source Protection Zone III (Total Catchment).
